

# CAST LIP SYSTEM

More productivity hours than any other cast lip system on the market.

## THE WIDEST RANGE OF CAST LIP SYSTEMS AVAILABLE.

- *CR technology excellence*
- *180 ton to ultra class shovels*
- *Optimised and configured for your needs*
- *Supported by the widest range of G.E.T. and wear technology*

# THE MOST ADVANCED PRODUCTIVITY SOLUTIONS.

## Designed for productivity.

The CR cast lip range is designed specifically to improve the productivity of surface mining equipment. Our dedicated team of product experts is committed to delivering a product that meets your mining requirements.

CR designs simplify the maintenance process, reduce the demand on maintenance teams and improve digging efficiency with the correct G.E.T. application.

Whether you are targeting better utilisation, efficient cycle times or optimised fill factors, with our expert advice and service options, you can be sure a CR cast lip is the right choice.

## DECAEDGE

Cast lip for large mining wheel loaders.

**WORLD FIRST**  
11 station cast lip  
Suits L2350  
wheel loaders

## STINGRAY

Large cast lips delivering proven productivity improvements for 400-1000T hydraulic excavators.

## RAZEREDGE

The only proven cast lip solution for 200-400T hydraulic excavators.

# TRANSFORM THE STANDARD.

## Utilisation

Machine utilisation plays a significant role in machine productivity. The more time it spends digging, the higher the output. Cast lip and G.E.T. reliability is crucial in reducing unnecessary downtime.

## Fill Factor and Pass Match

Filling your buckets fuller and your trucks in fewer passes is critical for increased productivity. With the largest range of cast lip and G.E.T. options available, you will be able to optimise your bucket selection to ensure better fill factors and cycle times.

## Cycle Time

Cycle Time can play a significant role in the productivity of any excavator. It is essential that the cast lip and G.E.T. create as little resistance as possible. CR cast lips reduce dig energy by as much as 10% compared to other lips.
